PROFILE

Dedicated to advancing a safer digital world by proactively identifying and addressing security weaknesses through real-world attack simulations. Known for applying a hands-on, curious approach in ethical hacking, vulnerability discovery, and creative problem-solving. Contributed to risk reduction for organizations by detecting exploitable flaws before malicious actors, consistently focusing on strengthening defenses from the inside out. Demonstrated commitment to continuous learning and effective application of offensive security tactics for robust cyber defense.

EXPERIENCE

Student aan Bedrijf B.V | IT Consultant **Oct 2024 – Present**

Merem Revalidatie Centrum (Nov 2024 – Jan 2025):

- Helped 30+ end users with all technical questions concerning the newly deployed system.
- Supported the cleaning and transfer of large medical data sets from old to new system, ensuring data integrity and security.

Student aan Huis B.V | IT Consultant **Oct 2024 – Present**

- Provided onsite technical support for 100+ clients, including troubleshooting computer systems, networks, and digital devices.
- Configured and resolved issues regarding hardware, software, and Wi-Fi connections; implemented basic network security solutions and firewall settings to minimize risks.
- Educated clients on secure online practices, enhancing their data protection and privacy.
- Delivered customized solutions aligned with client needs, improving technical and communication skills.

UpWork – Freelance

Jun – Sept 2021

Conducted quality testing for 7+ customer service teams and assisted with technical problem management, applying attention to detail and troubleshooting skills.
